Contractor Comments:

Please disregard the standard 75% ceiling notification presented above.

Amendment requested due to delays in obtaining access (on-site reconnaissance activities were conducted Spring, 1996); review of extensive historical information and analytical data compiled in numerous reports required to evaluate a sampling decision; delays in obtaining critical analytical information from third party sources (current and former site owner consultants) required to adequately access sampling decision requirement; reversal of EPA SAM from sampling required to the current status of verbal non-sampling. Tasks remaining to be completed for this site include completion of the draft report and preparation of the final report. START anticipated no change in the cost required to complete this project. However, the new anticipated completion date for the project is 31 December 1996.
